August	8.18.08	SC	N/A	NN	SC	Good	Good	Good			Yes	Yes
September	9.11.08	SC	N/A	SC	NN	Good	Good	Good			Yes	No
October	10.8.08	SC	N/A	NN	NN	See note	Good	Good			Yes	No
November	11.5.08	SC	N/A	NN	NN	Good	Good	Good			Yes	Yes
December												

Key: SC = Service Completed NN = Service Not Needed

### Additional Notes:

**11.5.08-** Dry pond functioning properly after recent rainfall.

**10.8.08-** Dry pond is functioning properly. Suggest mowing dam soon and cutting back vegetation. Inlets and outlets functioning properly.

**9.11.08-** Seeing good control of cattails from last month's treatment. BMP appears to have functioned properly during recent (9.10.08) rain event. Recommend trimming and mowing on dam and around pond area soon.

**8.18.08-** Cattails growing rapidly, treated and should gain sufficient control. Inflow and outflow look good, side slope still well-vegetated.

# Stormwater Wet Pond BMP Maintenance Log

Property: Villages at Crocketts Ridge

### Additional Notes:

**11.5.08-** Pond functioning properly after yesterday's rain event. Added pond dye to enhance appearance. Vegetative buffer healthy, BMP functioning properly.

**10.8.08-** Added 4 grass carp to pond to help control aquatic vegetation. Inlet, outlet functioning properly. Noted yard waste pile at corner of pond, need to be careful that yard waste is not entering pond. Suggest cutting back vegetation on dam.

**9.11.08-** Pond looks good after recent (9.10.08) rain event. Algae appears to be under control and pond is discharging as designed after recent rainfall. Cleared some vegetation from outlet pipe. Recommend trimming and mowing vegetation on dam and around pond area.

**8.18.08-** some filamentous algae beginning to grow, treated with appropriate algaecide and should achieve desired control. Vegetative buffer is in good condition and the pond is functioning well.
